

To Parent's/Guardian

On Friday November 13, 2015 (P.A. Day **NO SCHOOL**, the school yard will be off limit) as a team of workers will be using a crane to lift equipment on to the roof of the school for the installation of the solar panels. There will also be a small fenced off area on the north/east side of the building where they will store their equipment for the extent of the project; they will also have a porta potty on site.

The projected time is 6-8 weeks. They have assured us that there will be little impact on the school day beyond hearing foot traffic on the roof.

Ms. A. Hardy
Principal
